

Access - Your money, your time, your home. Get the best financing rates, keep up to date on your financial health and an eye on your equity all through our app, Access!

Saves the end customer time by having all financial info in one place. This enables the app to be able to link to various lenders for the best financing rates. The customer can also track equity and net worth/financial health.

Problem - It's time consuming to look around for mortgage financing and rates, giving out personal financial info to each individual bank. With this app, the lenders come to you, and you can also track your net worth over time.

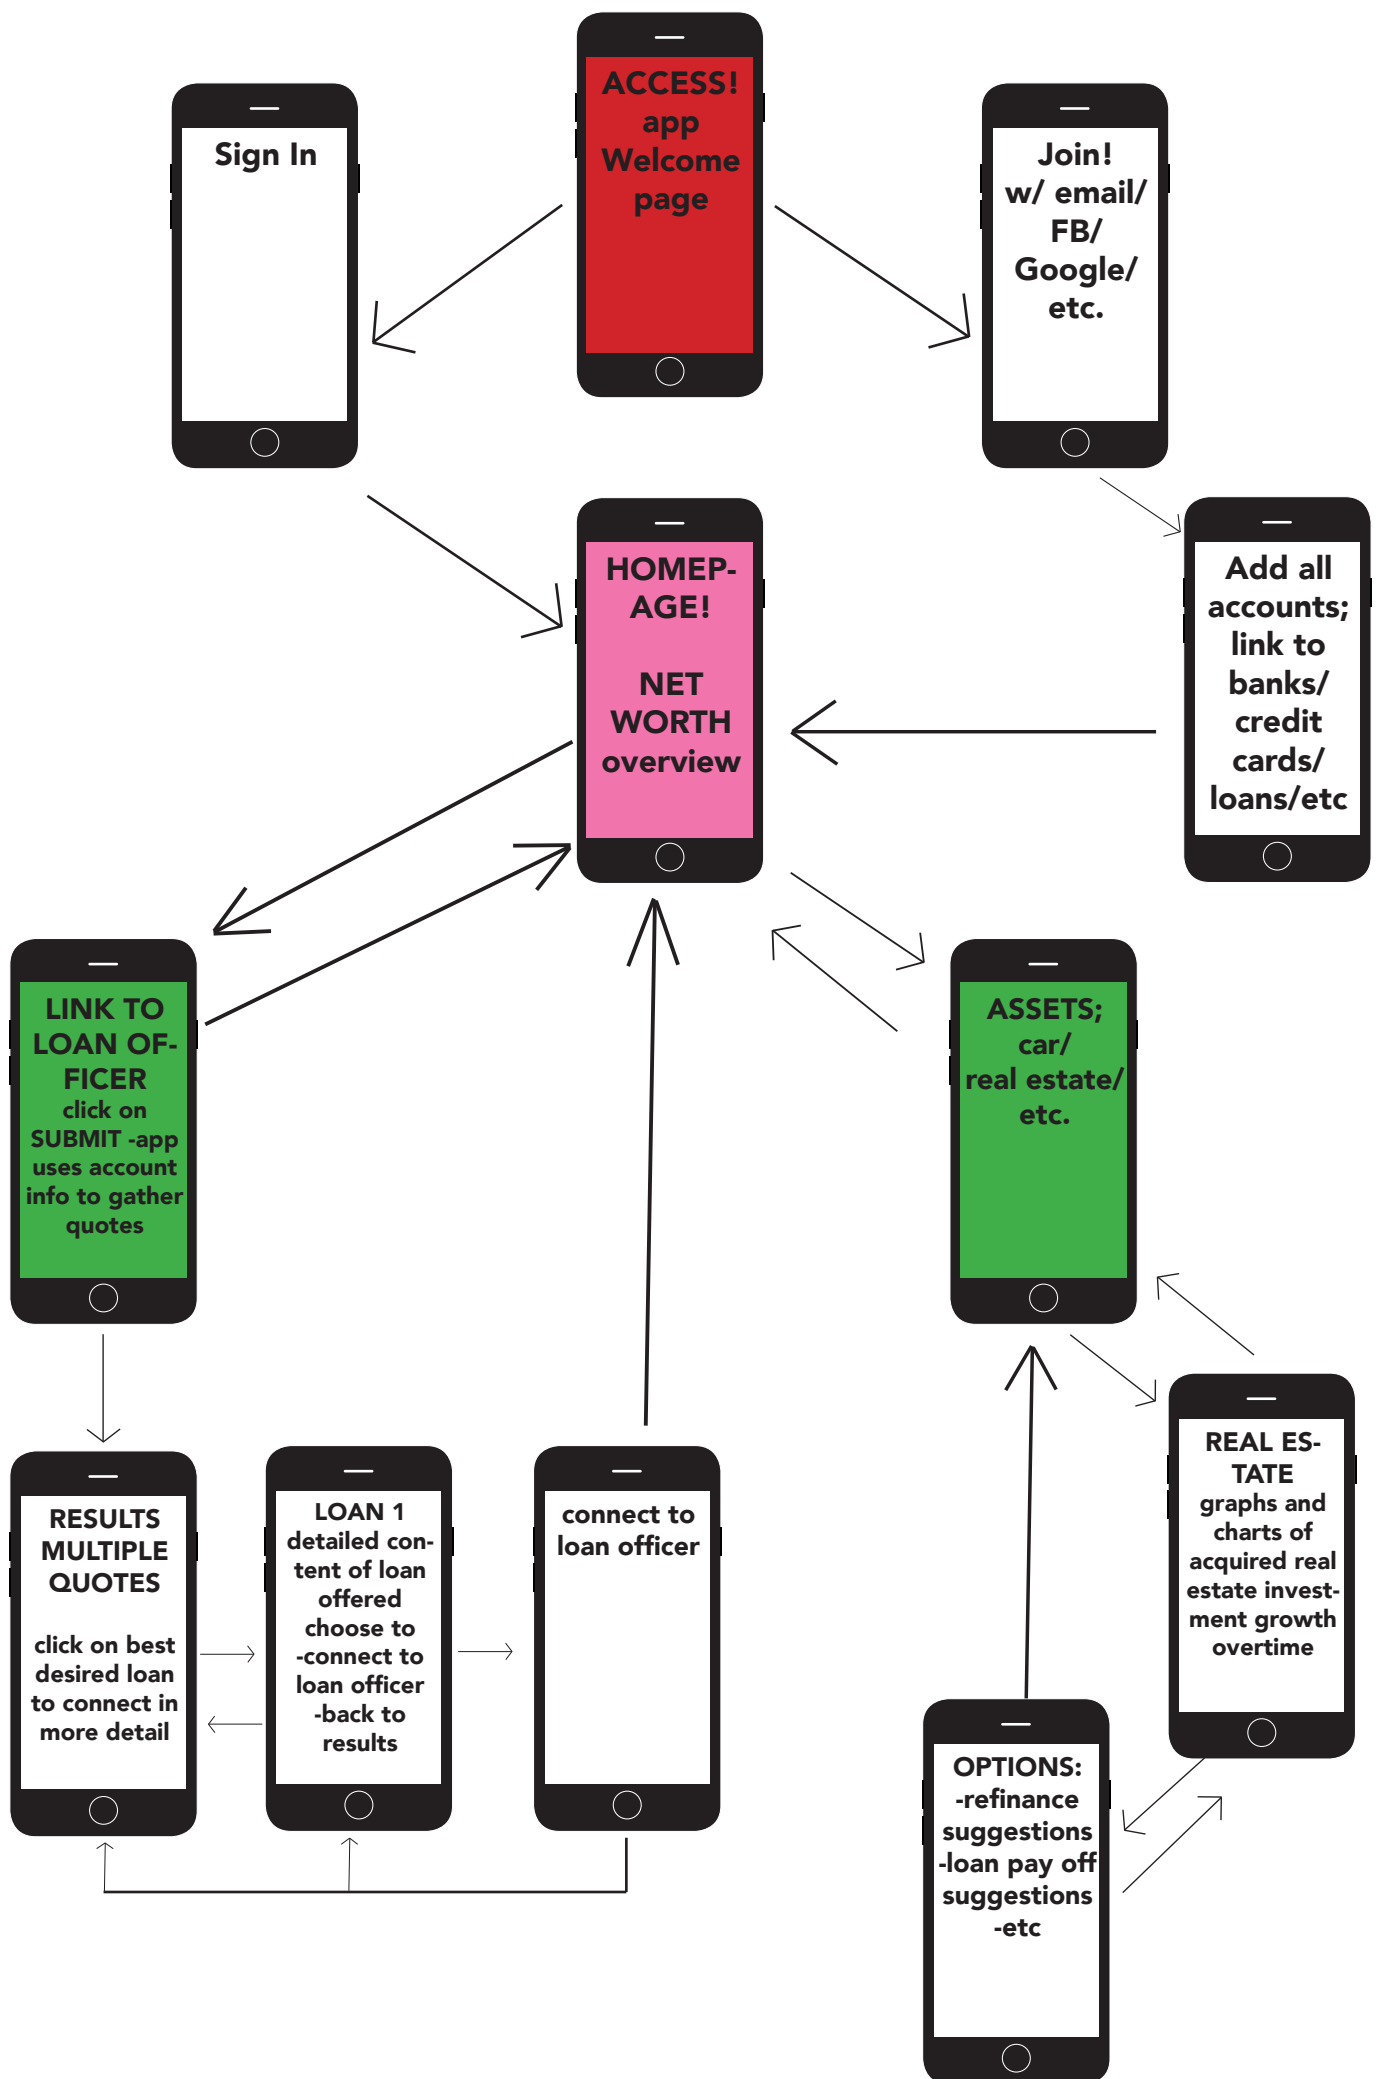

Solution - By inputting all their financial info into the app, the app then uses this info to connect to lenders to gather specific personalized loan rates. This enables the customer to make a quicker decision about an investment. By having all financial info, the customer can also keep track of their financial health by seeing an overview. Once the investment is acquired, the app can also track the equity growth over time.

1. Most important/primary function is to provide personally tailored mortgage loans/rates.

2. Let the customer know how healthy their finances are, and how much they can afford to buy.

3. Track Net worth over time

4. Track equity in real estate purchase, - enabling possible refinancing options as well.
