

1. OrderIO

2. App for late night eaters, who want to find nearest food during the night time. Working hours for the app will be from 9pm to 8am. The hours are chosen in order to provide people with the exact night time working food.

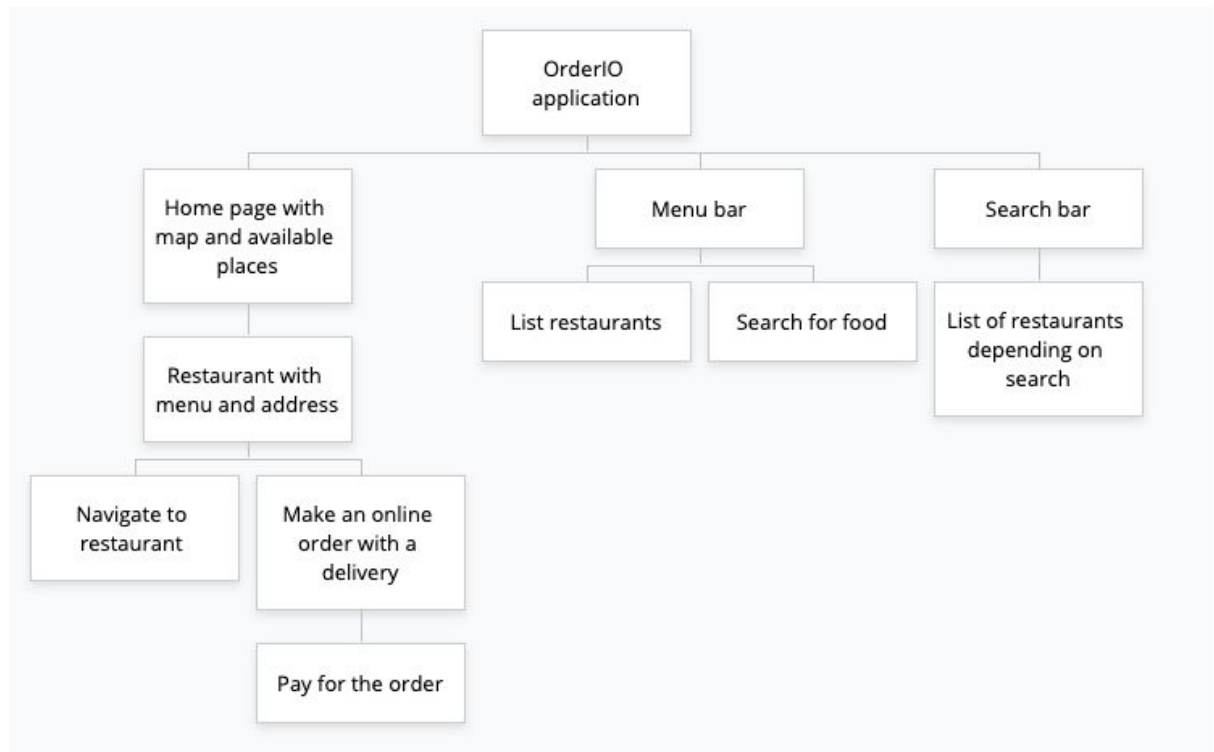

sit

For example if you want to buy doritos at night and your local stores are closed, you look for the night time shops and if you want to you can even order it and it will be delivered.

The app is made mostly for students who study lately at night. Or for families who travel through the city at night and can't find shops because they dont know the city as transits.

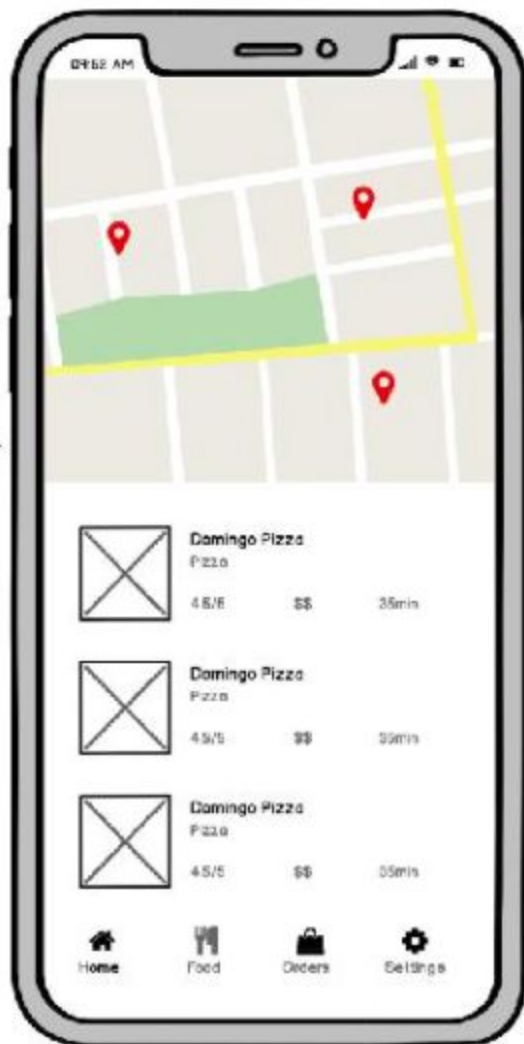

It will be an application which can be downloaded to your phone. If you don't want delivery then you don't need to register. Just download and go.

3. Night meals are meals too.
4. It will have a map on the main screen and open shops. Also it will have search bar on top in case they want something specific.
