Renovo App - Never refuse to reuse!

Description:

A waste collection app that points out all collection points near you including containers and re-use centers, also a sorting guide that helps you sort your waste correctly. UX Research & Design created as part of the Coursera UI/UX Design course specialization by California Institute of the Arts.

Specific functions that my app will do:

Collection Points: Find the shortest route to all collection points near you: container parks, re-use centers , collection points for batteries and electronics, et cetera.

Sorting Guide: Find out how to sort any type of household waste correctly from PMD to electronics.
